CONTENTS OF VOLUME XVII.

NUMBER 1.

PAGE

1. On Bacterial Invasion of the Inner Ear in the Course of Diphtheria. By S. Moos, of Heidelberg. Translated by H. A. B. MacCauley, New York. (With 12 illustrations—plates i.–v.—and 4 temperature charts—plates vi.–xi.) 1
2. Fistulæ Fissurarum Branchialium together with Peculiar Malformation of the Membranæ Tympani. By Ole Bull, Christiania, Norway 36
3. Contributions to the Anatomy of the Ear. By Dr. A. Barth, Berlin. Translated by J. A. Spalding, M.D., Portland, Maine. (With one wood-cut.) 40
4. Bi-Lateral Labyrinthine Affection during Cerebro-Spinal Meningitis. By H. Steinbruegge, of Giessen. Translated by J. A. Spalding, M.D., Portland, Maine 52
5. Labyrinthine Disease in a Case of Leukæmia. By Dr. H. Steinbruegge, Giessen. Translated by J. A. Spalding, M.D., Portland, Maine 59
6. A Case of Carcinoma of the Ear, having its Origin Probably in the Tympanum of Mastoid Antrum. By Gorham Bacon, M.D., and A. T. Muzzy, M.D. (With one wood-cut.) 66
7. On the Function of the Cochlea. By S. Moos and H. Steinbruegge. Abstract by Dr. H. Knapp 71
8. The Pupils in the Deaf-Mute Institution of Ludwigslust, Mecklenburg. By Dr. Chr. Lemcke, of Rostock. Abstract from the German edition, Vol. XVI., pp. 1–30, 1886, by Dr. H. Knapp. 72
9. Report on the Progress of Otology during the First Half of the Year 1887. By Dr. A. Hartmann, Berlin, and Dr. Ed. Schulte, Milan. Translated by Dr. Max Toeplitz, New York 74

B.—Pathology and Therapeutics.

NUMBER 2.

1. The Influence of Pilocarpine upon the Mucous Membrane of the Tympanum. By Dr. W. Kosegarten, of Kiel. Translated by Charles H. May, M.D., New York 95
2. A Case of Foreign Body in the Middle Ear. By Elizabeth Sargent, M.D., of San Francisco. (With one wood-cut) 102

PAGE

3. The Determination of the Acuteness of Hearing. By Dr. A. Barth, of Berlin. Translated by Charles H. May, M.D., New York . 109
4. The Graphic Representation of the Results of the Tuning-Fork Test. By A. Hartmann, of Berlin. (Abstract by Dr. H. Knapp.) 116
5. Tuning-Fork Tests. By Dr. H. Steinbruegge, of Giessen. Translated by J. A. Spalding, M.D., of Portland, Me. . . . 117
6. Appendix to "The Diagnostic Value of Rinné's Experiment, with Remarks on the Physiological Function of the Sound-Conducting Apparatus," in Vol. XVI., page 188, etc., of these ARCHIVES. By Frederick Bezold, of Munich. Translated by H. A. B. MacCauley, M.D. 130
7. The Decrement of Sounding-Out Tuning-Forks. By A. Barth, of Berlin. Translated by J. B. McMahon, M.D., of New York. (With two cuts) 152
8. Clinical and Pathological-Anatomical Contributions to the Operation of Opening the Mastoid Process. By Dr. A. Hedinger, of Stuttgart. Translated and condensed by Charles H. May, M.D., of New York 160
9. Report on the Progress of Otology during the Latter Half of the Year 1887. By A. Barth, Berlin, Translated by Dr. Max Toeplitz, of New York 180

I.—Normal and Pathological Anatomy, Histology, and Physiology of the Ear and Naso-Pharyngeal Cavity.

Review 195

Miscellaneous Note 196

NUMBER 3.

1. On Ménière's Disease. By Gustav Brunner, of Zurich. Translated by Dr. J. H. Shorter 197
2. A Communication upon the Medical Duplex-Inductorium. By R. Wreden, of St. Petersburg. (With a wood-cut.) Translated by Charles H. May, M.D., New York 212
3. Malformation of the Auricles; Branchial Fistulæ; Chronic Purulent Inflammation of the Middle Ear; Examination of the Labyrinth. By H. Steinbrügge, of Giessen. Translated by Dr. J. B. McMahon, New York 226
4. Recent Observations of the Formation of Cysts in the Auricle. By Arthur Hartmann, of Berlin. Translated by Dr. Max Toeplitz, New York 233
5. Markedly Protracted Course of Suppurative Otitis Media in Three Cases of Tuberculosis. By A. Eitelberg, Aurist at the General Policlinik in Vienna. Translated by Dr. Max Toeplitz, New York 236

PAGE

6. Influence of the Use of the Telephone upon the Hearing Power. By Clarence J. Blake, M.D., Boston 240

7. What can the Human Ear Hear without the Stapes? By E. Berthold, of Königsberg. Translated by Dr. J. B. McMahon, New York 244

8. Report on the Progress of Otology during the Second Half of the Year 1887. By A. Hartmann, Berlin. Translated by Dr. Max Toeplitz, New York 251

C.—Pathology and Therapeutics.

NUMBER 4.

1. Physiological Investigations of Nasal Respiration. Part I. By E. Bloch, of Freiburg (Baden). Translated and abridged by Drs. S. De Jager and F. Cohn, of New York. (With 4 cuts). . . 279

2. Report of Cases of Disease of the Mastoid Process with Remarks. By Henry Ferrer, M.D., San Francisco, Cal. 308

3. Report on the Otological Section of the British Medical Association in 1888. By Dr. Thos. Barr 327

4. Report on the Progress of Otology during the First Half of the Year 1888. By A. Barth, Berlin. Translated by Dr. Max Toeplitz, New York 348

I.—Normal and Pathological Anatomy, Histology, and Physiology of the Ear and Naso-Pharyngeal Cavity.

A.—Anatomy.

B.—Physiology and Physics.

II.—Pathology and Therapeutics.

5. Index 381

CONTENTS OF VOLUME XVII., NUMBER 1.

1. On Bacterial Invasion of the Inner Ear in the Course of Diphtheria. By S. Moos, of Heidelberg. Translated by H. A. B. MacCauley, New York. (With 12 illustrations—plates i.–v.—and 4 temperature charts—plates vi.–xi.) 1
2. Fistulæ Fissurarum Branchialium, together with Peculiar Malformation of the Membranæ Tympani. By Ole Bull, Christiania, Norway 36
3. Contributions to the Anatomy of the Ear. By Dr. A. Barth, Berlin. Translated by J. A. Spalding, M.D., Portland, Maine. (With one wood-cut.) 40
4. Bi-Lateral Labyrinthine Affection during Cerebro-Spinal Meningitis. By H. Steinbruegge, of Giessen. Translated by J. A. Spalding, M.D., Portland, Maine 52
5. Labyrinthine Disease in a Case of Leukæmia. By Dr. H. Steinbruegge, Giessen. Translated by J. A. Spalding, M.D., Portland, Maine 59
6. A Case of Carcinoma of the Ear, having its Origin Probably in the Tympanum or Mastoid Antrum. By Gorham Bacon, M.D., and A. T. Muzzy, M.D. (With one wood-cut) 66

9. Report on the Progress of Otology during the First Half of the Year 1887. By Dr. A. Hartmann, Berlin, and Dr. Ed. Schulte, Milan. Translated by Dr. Max Toeplitz, New York 74

B.—Pathology and Therapeutics.

NOTICE TO CONTRIBUTORS.

The editors and publishers of the ARCHIVES beg to offer some suggestions to authors who propose to favor them with their contributions.

1. As original communications the ARCHIVES can accept only such papers as have never been printed nor are intended to be printed in other journals. If a preliminary communication on the subject of a paper has been published, the author is requested to state this in the letter accompanying his manuscript. It is understood that contributors to these ARCHIVES and editors of other periodicals will make no abstracts of the original papers published in this journal without giving it due credit for the same.

2. Authors will receive gratuitously twenty-five reprints of their articles. If a greater number is desired,—notice of which should be given at the head of the manuscript,—only the additional cost of presswork and paper will be charged to the author.

3. In preparing manuscript for the compositor it is requested that the following rules be adhered to:

a. Write on one side of the paper only.

b. Write without breaks, *i. e.* do not begin a new sentence on a new line. When you want to begin a new line or paragraph at a given word, place before it in your MS. the sign ¶.

c. Draw a line along the margin of such paragraphs as should be printed in smaller type—for instance, all that is clinical history in reports of cases, etc.

d. Words to be printed in *italics*, should be underscored once, in SMALL CAPITALS twice, in LARGE CAPITALS three times.

4. Authors may receive proofs for revision if they will kindly return them without delay. We beg however to remind our contributors that changes in the copy are equivalent to resetting, causing so much additional expense. We therefore request them, to make, if possible, no alterations at all in their MSS., or, at least, to limit these to what is of essential importance.
